PROFESSIONAL SUMMARY

Software Developer with strong fundamentals in Java, RESTful APIs, and database-driven web applications, with exposure to AI-based development. Skilled in building backend services, API integrations, and responsive user interfaces using Java, HTML, CSS, JavaScript, and React. Familiar with Python, Machine Learning, and SQL databases.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, SQL
- **Full Stack Technologies:** Java, RESTful APIs, Node.js, Express.js, HTML5, CSS3, JavaScript, React.js, jQuery, AJAX
- **AI / Machine Learning:** Machine Learning, Data Preprocessing, NumPy, Pandas, Scikit-learn, Jupyter Notebook
- **Databases:** MySQL, MongoDB, SQL
- **Tools and Platforms:** Git, GitHub, Postman, VS Code, Android Studio
- **Concepts:** Object-Oriented Programming, MVC Architecture, API Integration, Authentication Authorization, Data Validation, Error Handling
- **Cloud / Other:** AWS, Version Control, Agile workflow

PROFESSIONAL EXPERIENCE

AI Developer

Smartkeen Tech

Sept 2025 – Mar 2026

- Worked on AI-driven application features using Java-based data processing and backend API integration.
- Contributed to a client-based Incentive Management Application, working on backend services, API integration, and data processing for AI-driven workflows.
- Implemented validation logic, business rules, and workflow enhancements to support enterprise-level application functionality.
- Performed data preprocessing and assisted in implementing machine learning based functionality.

Full Stack Web Developer

Suprmentr

Sept 2024 – Feb 2025

- Designed and developed full stack web applications with RESTful backend services and responsive frontend interfaces.
- Built secure APIs, handled authentication workflows, and integrated frontend applications with backend services.
- Worked with databases to design schemas, write SQL queries, and manage application data.
- Used Git for version control and Postman for API testing and validation.

Front End Development Intern

Abeyaantrix Softlab

Aug 2023

- Developed responsive user interfaces using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Implemented AJAX-based interactions and collaborated with backend teams for API integration.

Java Developer Intern

Genesis

Oct 2022 – Nov 2022

- Built Java-based applications following OOP principles and MVC architecture.
- Gained hands-on experience with REST APIs, exception handling, multithreading, and backend logic.

PROJECTS

Netflix Clone – Full Stack Web Application

- Developed a full stack application with RESTful APIs, JWT-based authentication, and role-based access control.
- Built responsive UI using React.js and integrated backend services with database storage.

Incentive Management Application – Client Project

- Worked on a client-based Incentive Management Application as part of project team.
- Developed backend services, API integrations, and validation logic for workflow-driven features.
- Contributed to data processing, business rules implementation, and system enhancements.

Stress Detection System using Wearable Sensors

- Implemented data processing pipeline for machine learning based stress detection.
- Performed data validation, preprocessing, and backend logic development.

Odoo ERP Customization Project

- Customized backend modules and workflows to enhance enterprise business processes.
- Worked with relational data models, role-based access, and system integrations.

EDUCATION

Bachelor of Engineering – Computer Science

Bapuji Institute of Engineering and Technology, Davangere
CGPA: 7.5

Dec 2021 – May 2025

ACHIEVEMENTS

- Winner – Byte Talks Coding Event (Coding Club Brigade)
- Third Place – Debate Competition, Planathon (BIET)
